Marcos Rios

Roma, TX (Open to Remote) · hola@marcosuriel.com · marcosuriel.com · linkedin.com/in/marcos-rios-

SUMMARY

Product designer with six years across web and mobile, including B2B checkout for small-business buyers at Dell and customer-facing and internal tools at H-E-B. Maps multistep processes and redesigns them as clear guided flows validated in usability testing. Grew up on the Texas border in Roma; designs for bilingual users, shared devices, and slow connections.

CORE SKILLS

Design: UX/UI, interaction and visual design, information architecture, multistep forms and onboarding, B2B workflows, responsive web, iOS, accessibility (WCAG)
Research: user interviews, surveys, usability and prototype testing, workshops, journey and decision mapping, research synthesis
Prototyping & handoff: wireframes, user flows, interactive prototypes, interaction specs, engineering handoff, implementation review
Tools: Figma, FigJam, Adobe Creative Suite, Adobe XD, Jira, Confluence, Claude Code, Codex · Languages: English, Spanish

EXPERIENCE

Freelance Product Designer | Independent | 2025–Present

- Design web and mobile products for small businesses and startups, from audit and research through flows, prototypes, usability testing, and final UI.
- **Lino's Pharmacy:** Redesigned the homepage so patients could find and use Pablo, its existing AI text-and-call assistant, for refills and medication questions; 7 of 10 early-test participants completed a text or call task.
- **Noah's Ark:** Redesigned an iOS lost-pet app's reporting flow, moving the report to the home screen and replacing a long form with a two-step guided report, review step, and shareable flyer with Spanish labels.
- **Hello Rivers:** Built the brand and website for a design studio and template shop serving small businesses.

Product Designer | H-E-B | 2022–2025

- Led design of customer-facing and internal tools from discovery to delivery with product, engineering, and content design.
- **CRM AI:** Interviewed support associates and managers, mapped decision trees for missing-delivery and coupon-refund cases, and co-designed a guided AI assistant prototype inside reps' Salesforce tools; every participant completed their tasks in testing.
- Ran workshops, user interviews, and usability tests to set design priorities and validate prototypes before build.

Product Designer | Dell | 2020–2022

- Designed B2B e-commerce experiences across several initiatives, from user interviews and flow mapping to wireframes and prototypes.
- Redesigned the small-business checkout with plainer wording and clear progress indicators after interviews showed owners stalling mid-purchase.
- Prepared engineering handoffs with specs and interaction details, and reviewed implemented screens against the design during build.

UX/UI Designer | RoverPass | 2020

- Redesigned the campground calendar and checkout, consolidating a text-heavy, multistep booking into one clear flow tested in usability sessions.

EARLIER EXPERIENCE

Customer Experience Specialist (Spanish) | eBay | 2019–2020

- Supported Spanish-speaking buyers and sellers in a high-volume queue, resolving and documenting issues in customers' own words.

Lead Graphic Designer | City of Hutto | 2017–2019

- Led a citywide rebrand informed by community interviews and wrote its brand guide (two state-level TAMI awards), applying it across city programs and communications.

Web Designer | My Lead System Pro | 2016–2017

- Designed landing pages and email assets for client campaigns and took part in user interviews that informed platform improvements.

EDUCATION

UT Rio Grande Valley | BFA Graphic Design, BA Communication Studies, Minor Psychology · Designlab UX/UI Certification, 2019
